Report Overview: This publication on the Status of Women in Hamblen County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

The Status of Women in Tennessee Counties

HAMBLLEN

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation, female unemployment, and percentages of women in professional or managerial occupations.

- ◇ Hamblen County women have median annual earnings of \$21,308, but they still only earn 71.0% of males' earnings in the county.
- ◇ Women make up 50.7% of the county population but only 42.3% of women participate in the labor force
- ◇ 23.1% of women hold positions in managerial or professional occupations, almost on par with the percentage of all employees in the county in management or professional positions (22.3%).
- ◇ The female unemployment rate is almost 5 percent, which is only slightly higher than the county's overall unemployment rate of 4.2%.

Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ 70.1% of women in Hamblen County have a high school diploma or the equivalency, more than the percentage of all county residents (69.3%).
- ◇ 12.6% of women in the county attained a four-year college degree or better, less than the percentage of both men and women with a four-year degree or better (13.3%).
- ◇ Over 89 percent of women have some kind of health insurance coverage, but almost 15 percent of female employees earn incomes below the poverty.
- ◇ Just over 10 percent of all families in the county live below poverty level but 32.1% of families with a female householder and no husband present are in poverty.
- ◇ Though 17.4% of businesses in the county are owned by women, women-owned businesses account for 6.7% of sales and receipts in the county.
- ◇ Women account for 52.5% of eligible voters in Hamblen County but only 6 out of 22 elected county positions are held by women.

ABOUT THE COUNCIL AND THIS REPORT

Hamblen County

The Status of Women in Tennessee Counties report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
